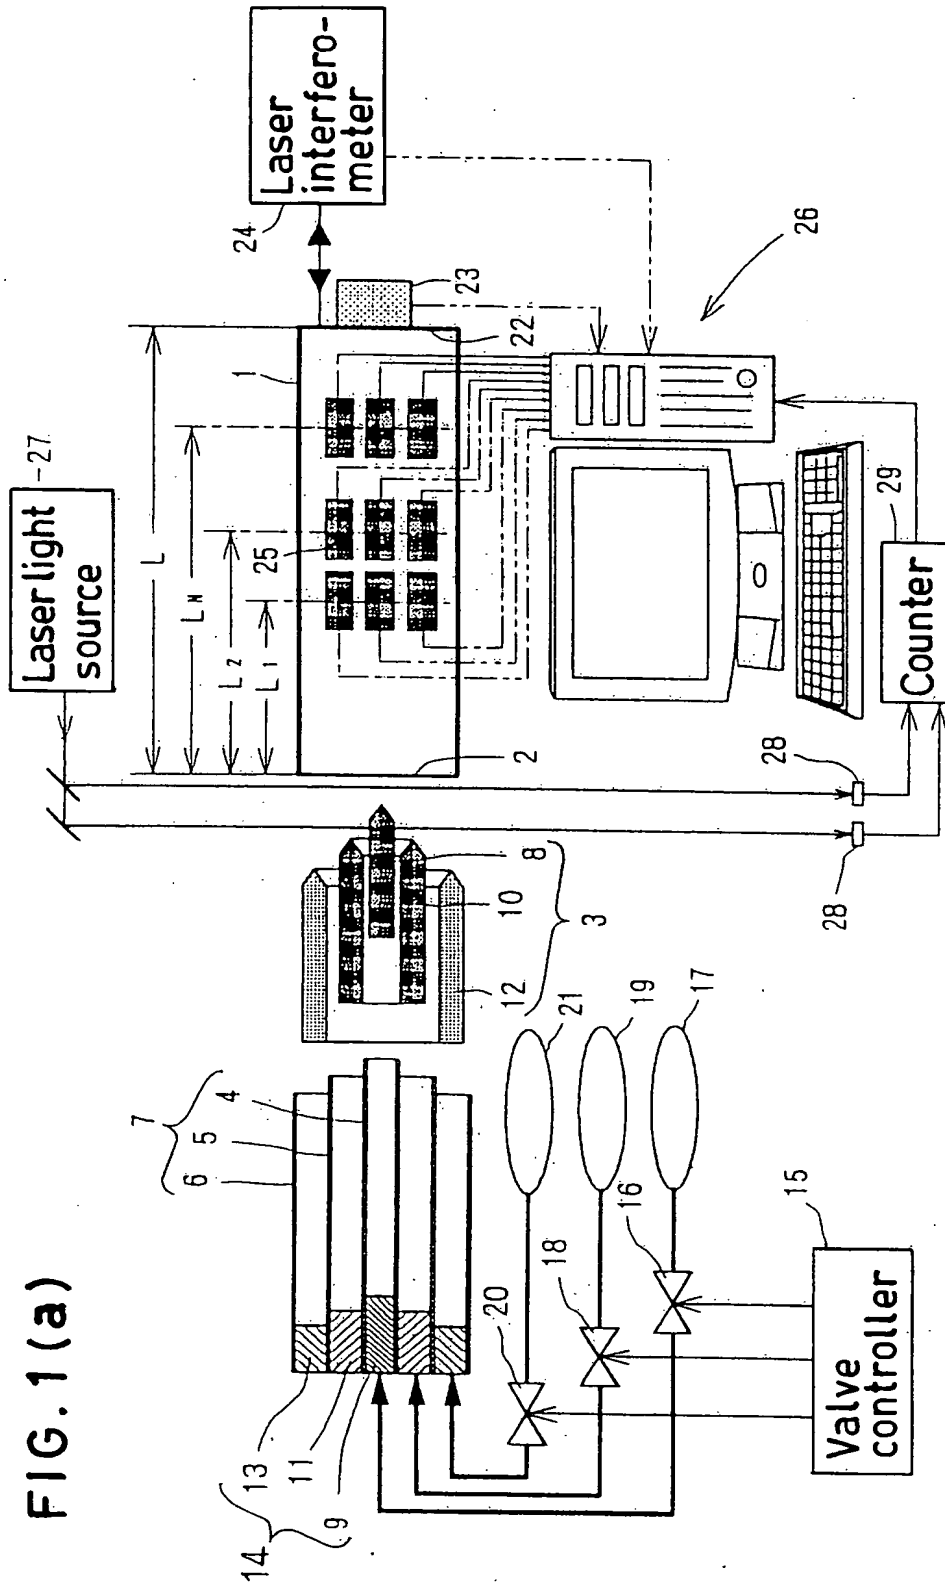

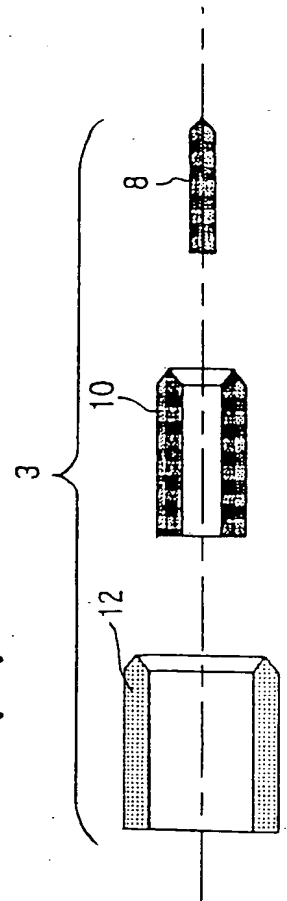

FIG. 1(b)

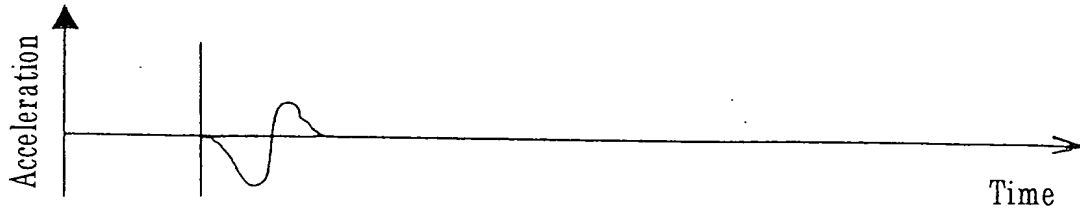

Rec'd PCT/PTO 25 APR 2005

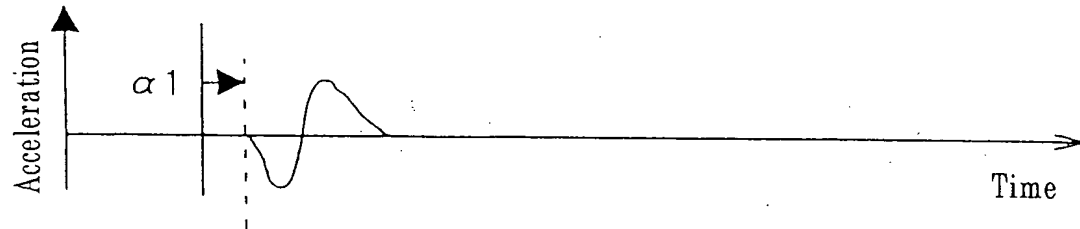

2 / 2

FIG. 2

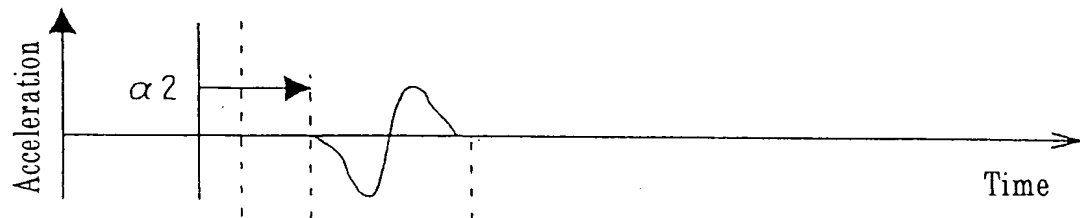

- (a) Shock acceleration generated by just the first projectile measured by strain gauge

- (b) Shock acceleration generated by just the second projectile measured by strain gauge

- (c) Shock acceleration generated by just the third projectile measured by strain gauge

- (d) Shock acceleration generated by controlling the launch timing of projectiles to produce superposition, measured by strain gauge
